Objective

Passionate web developer looking to develop new software to enable people to accomplish their goals more efficiently.

PROFESSIONAL EXPERIENCE

Software Developer
Lowe's Companies

Responsible for developing and maintaining internal applications that support product data, while delivering different aspects of software from design to finished product in short duration.

- Reduce monolith application into multiple micro services.
- Deliver software bug fixes in short duration.
- Work with mainframe servers to implement batch applications to handle heavy data processing.
- Help utilize scrum process with overseas development team.
- Conduct code reviews and code trainings on new frontend technologies

Software Developer
ProctorFree

Implemented full stack software for desktop and web, while delivering the best software design from strategy to finished product. Assisted with utilizing Restful api, debugged facial detection algorithms and helped port desktop application to full web app.

- Worked closely with clients being involved in every step of the development lifecycle.
- Developed from ground up an in-house quick books solution for money processing.
- Provided IT help desk support for application issues.
- Provided SIT testing scripts for new product releases.

Payment Specialist
Avidxchange

Worked directly with vendors to make timely e-payments and to ensure vendors information was accurate though data analysis and review. Also performed account payable duties for avid invoice.
